SUBJECT: Memorandum of Conversation, 25 May 1953, with [REDACTED]

1. Prior to our discussion of DD/P requirements for urban intelligence research, I presented the information I had obtained concerning intelligence research in Air Research Division, Library of Congress, and in the Target Integration Branch, Target Materials Division, AFOIN-3, which I concerted to be of value to the DD/P area.

2. [REDACTED] confirmed my tentative observation that DD/P knew very little about the intelligence activities in the above-mentioned units that would be of value to DD/P. To his knowledge, [REDACTED] said no contacts have been made with these units and that the only use being made of intelligence produced by them is that which was available in standard productions, i.e. Target Complex Studies, Annotated Target Mosaics and Target Information Sheets (TIS).

3. I pointed out that the Annotated Target Mosaics, produced by the Target Integration Branch as well as ARD up to the present time, contained only the administrative installations selected by the respective analysts. There was no uniformity of policy in the Target Integration Branch concerning the extent and nature of administrative control information incorporated in Annotated Target Mosaics. Moreover, there was evidence that the analysts in Target Integration Branch and ARD were not sufficiently qualified to deal with administrative control information. For example,

[REDACTED] As a result, I cautioned [REDACTED] to advise his people that at least insofar as administrative control installations were concerned that they must be handled with caution and reserve.

4. [REDACTED] also indicated that he had no knowledge whatever about the transmittal of [REDACTED] administrative control overlays to the Deputy Director for Targets, AFOIN-3, USAF. He indicated great interest in these overlays and requested that arrangements be made to obtain copies of them for DD/P.
